Pressure Certification

In order to certify your pressure instrument(s) we need to know:

- Accreditation: ISO 17025 or NIST w/DATA.

- Name of instrument manufacturer.

- Range of the instrument to be tested (e.g., 0/100 psi).

- Serial Number (Manufacturer serial # or a number given by quality control).

- Accuracy of instrument (e.g., +/- ½% full scale)

  - We can help you find the manufacturer's original accuracy if you don't know.

- Cycle time (How often the unit needs to be tested, e.g., 1 year).

- Standard Certification: 0.5% accuracy, 5 points tested
  Example: 0, 25%, 50%, 75%, 100% of the range

- Test Gauge Certification: 0.25% accuracy, 5 points tested.
  Example: 0, 25%, 50%, 75%, 100% of the range

- Test Gauge Certification: 0.1% accuracy, 10 points tested.
  Example: 0 and every major division of the range

- Special Certification
  Specific Test Points and Accuracy testing to meet your requirements.

- Contact person, phone number, and email address.

- Purchase Order #
  or
- Credit Card #

Normal turn-around time is one week.
